Receivable Financing & Pooled Receivable FInancing
Think Working Capital, Think CredAble

Receivables Finance & Pooled Receivables – Solution Workflow

★ Scope and Mechanism of Eligibility Check

Seller-driven parameters: Criteria such as buyer vintage, sales turnover, purchase history, or relationship tenure

External data checks: Bureau scores, bank ratings, payment history, or third-party risk assessments.

Invoice-level validations: Duplicate invoice detection, e-way bill verification, and MonetaGo fraud checks.

Program-specific rules: Minimum and maximum tenor validations, credit thresholds, and buyer concentration.

Recurring: Frequent update on outstanding debtors, recalculation of the eligible pool, limits and settlement

Platform Features: Data Ingestion and Program Management

CREDABLE

Design flexible receivables finance programs with seamless data capture and integration.

Data Ingestion

Multi-source Flexibility
- Capture data from anchors, admins, and counterparties.
- Handle program-specific variations in the type and depth of data collected.

Upload & API Integration
- UI uploads: Input file configurator maps custom fields into platform-standard fields; supports validations, data transformation, and automated adjustments.
- API feeds: Direct ingestion of invoice and entity data, ensuring real-time sync with external systems.

Customisation & Computation
- Handle adjustments automatically (e.g., net of credit notes, overdue tagging).
- Maintain detailed audit logs for every ingestion cycle.

External System Integrations
- Seamlessly connect with ERPs, credit bureaus, and financial data providers to fetch receivables data
- Auto-ingest critical information like buyer payment history, financial ratios, and bureau scores.
- Continuous updates keep eligibility and risk assessment dynamic.

Real-time Standardisation
- Transform diverse data formats into a single structured schema.
- Eliminate manual errors and ensure data is platform-ready at the point of ingestion.

Program Configuration

Multi-currency support: Configure interest rates, FX rates for booking notional limits, and define collection/disbursement accounts for sellers.

Flexible program rules: Set credit limits, payment terms, interest/penalty rates, and distribution of interest between buyer and supplier.

Invoice validations: Run checks for duplicacy, stale period, overdue invoices, external e-way bill validation, and MonetaGo fraud checks.

Tenor and exposure controls: Define minimum/maximum tenors and apply concentration limits at a buyer level.

Eligibility criteria: Assess counterparties using anchor-sourced data (vintage of relationship, delays, dilution) or external inputs (bureau scores, bank ratings).

Automated onboarding decisions: Approve or reject buyers based on configured eligibility rules.

Limit Management

Comprehensive limit types: Track sanctioned, utilised, blocked, adhoc, and transaction-level limits across daily, weekly, monthly, and YTD cycles.

Detailed attributes captured: program code, entity code (at anchor or counterparty level), provider details (bank/insurer), sync codes, dates, and status.

Real-time availability: Auto-calculate available limit (sanctioned – utilised – blocked) with date stamps for last booking/sync.

Integration and risk alignment: Sync with bank/insurance systems and adjust limits based on Trade Credit Insurance coverage..

Recurrence

Dynamic drawdowns: On every ledger upload, drawdown limits are calculated.

Automated cycle management: Ingest new ledger data at each cycle, reconcile cash received and compute fresh disbursement.

Platform Features: Program Management – Disbursement and Settlement

CREDABLE

Digitize disbursements, repayments, and monitoring with automated workflows and real-time insights

Workflow Automation

- Tailor transaction flows to bank-specific processes.
- Maker-checker approvals with back-and-forth communication for documents and disputes.
- Automated deviation handling (e.g., delays, documentation gaps) with escalation aligned to compliance.

Disbursement

- Manage disbursement of funds directly from defined bank or seller accounts.
- Support for multi-currency disbursement aligned with invoice currency.
- Disbursement linked to approved drawdown limits and financing eligibility.

Dashboards and Reports

- Intuitive views for suppliers and admins on financing eligibility, limits, maturities, past transactions, and risk flags. Status tracking of buyers and financed invoices in real time.
- Customizable reports on payment performance, credit utilization, overdue positions, and financed invoice status.

Repayment and Reconciliation

- Full loan visibility: booking details, disbursement info, linked invoices, repayment schedules, and current status.
- Track overdue amounts with breakup (interest, principal, charges) and DPDs.
- Record repayments with reference numbers and allocate at invoice level.
- Automatic reconciliation of repayments and dilutions against open invoices.

Settlement

- Auto-match incoming payments with outstanding invoices, updating buyer and supplier accounts.
- Manual override option for complex or exceptional settlement cases.

CREDABLE™
Strucutred Trade / Inventory Financing – Flash Title & Just In Time Inventory
Think Working Capital, Think CredAble

Strucutred Trade – Solving for the Working Capital Trinity for Large Enterprises

CredAble enables off-balance sheet liquidity for corporates through structured finance programs executed via TradeCos that act as master suppliers—**holding inventory**, **extending credit periods**, and enable **off-balance sheet liquidity.** Through the structures mentioned below CredAble solves for each element of a corporates **Cash Conversion Cycle.**

	Payables	Inventory	Receivables
Typical Use Case	Extension of short supplier credit periods without incurring on-balance sheet debt.	Inventory offload or demand-linked procurement without disrupting physical supply chains.	Liquidity unlocked through receivables sales, structured as true sale and without adding debt.
Structure in Focus	Flash Title Trade Leverages an intermediary TradeCo to consolidate vendors and extend credit periods—enhancing liquidity and financial metrics.	Just in Time Inventory A model where the TradeCo retains legal title of goods until required by the buyer, helping reduce on-book inventory and optimize working capital.	Receivables Monetization Receivables are sold to a financier via factoring, supported by third-party risk participation—enabling off-balance sheet treatment and liquidity access.
Benefits Achieved	✓ Longer credit periods release liquidity ✓ Improved Metrics – Longer **DPO** ✓ Aggregation of SME suppliers	✓ Monetization of idle inventory ✓ Need based procurement cycles ✓ Improved Metrics – Shorter **DIO**	✓ Immediate unlock of liquidity ✓ Desired (true sale) accounting ✓ Sizeable portfolio purchase

CredAble's Structured Trade Infrastructure – Experience across sectors

Sectors and Marquee Transactions

Industries

TMT | Retail | Chemicals | Industrials

Commodities

Energy | Agri | Cotton | Metals

Marquee Transactions

Flash Title Trade

Volume: USD 200Mn	**Tenor:** Upto 90 Days
SKUs: 5	**Locations:** 1

Deployed for a global TMT leader, this solution closed 50% of the working capital gap while also being completely off–balance sheet.

Just-in-Time Inventory

Volume: USD 2Bn	**Tenor:** 200+ Days
SKUs: 2000+	**Locations:** 20+

India's largest JIT inventory program, cutting inventory holding by 90% for the inventory included. Fully deployed and managed via proprietary technology.

Portfolio Receivables Purch.

Volume: USD 100Mn	**Tenor:** Upto 90 Days
Buyers: 150+	**Locations:** 1

Deployed one of India's largest portfolio receivables purchase programs, in partnership with a leading global bank, enabling cash release along with a true sale accounting treatment for a major Indian corporate.

CredAble's Structured Trade Infrastructure – Hub & Spoke Model

Geographies and Operational Infrastructure

Structuring Team

A core team of ex-bankers, technologists, and trade specialists across India, UK, and UAE with 200+ years of combined experience.

Functional Team

30+ legal, finance, risk, and supply chain ops professionals across CredAble offices, backed by a robust tech platform.

Partner Network

CredAble partners with affiliated trading entities, legal firms, accountants and auditors enabling it to execute trade transactions across the globe.

Hub and Satellite Operational Model

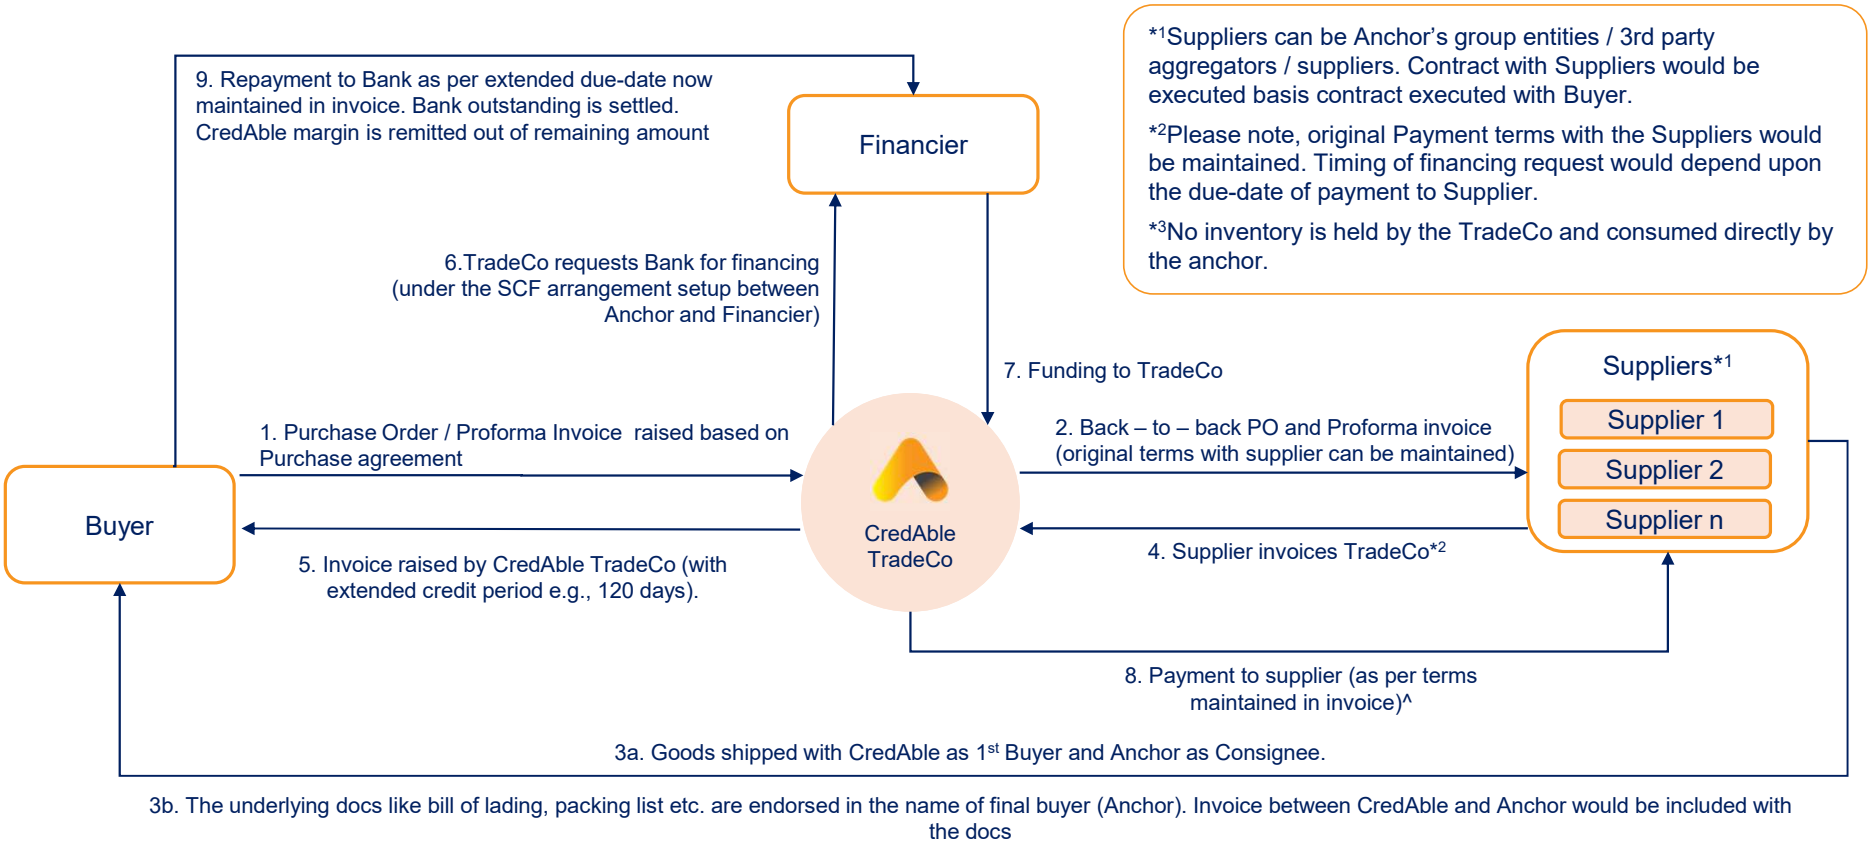

Each independent TradeCo (booking centre) operates under a formal Service Level Agreement (SLA) with CredAble, under which CredAble is authorised to execute all structuring, commercial, legal, and operational activities on behalf of the TradeCo.

Privileged & Confidential, © 2025, All Rights Reserved.

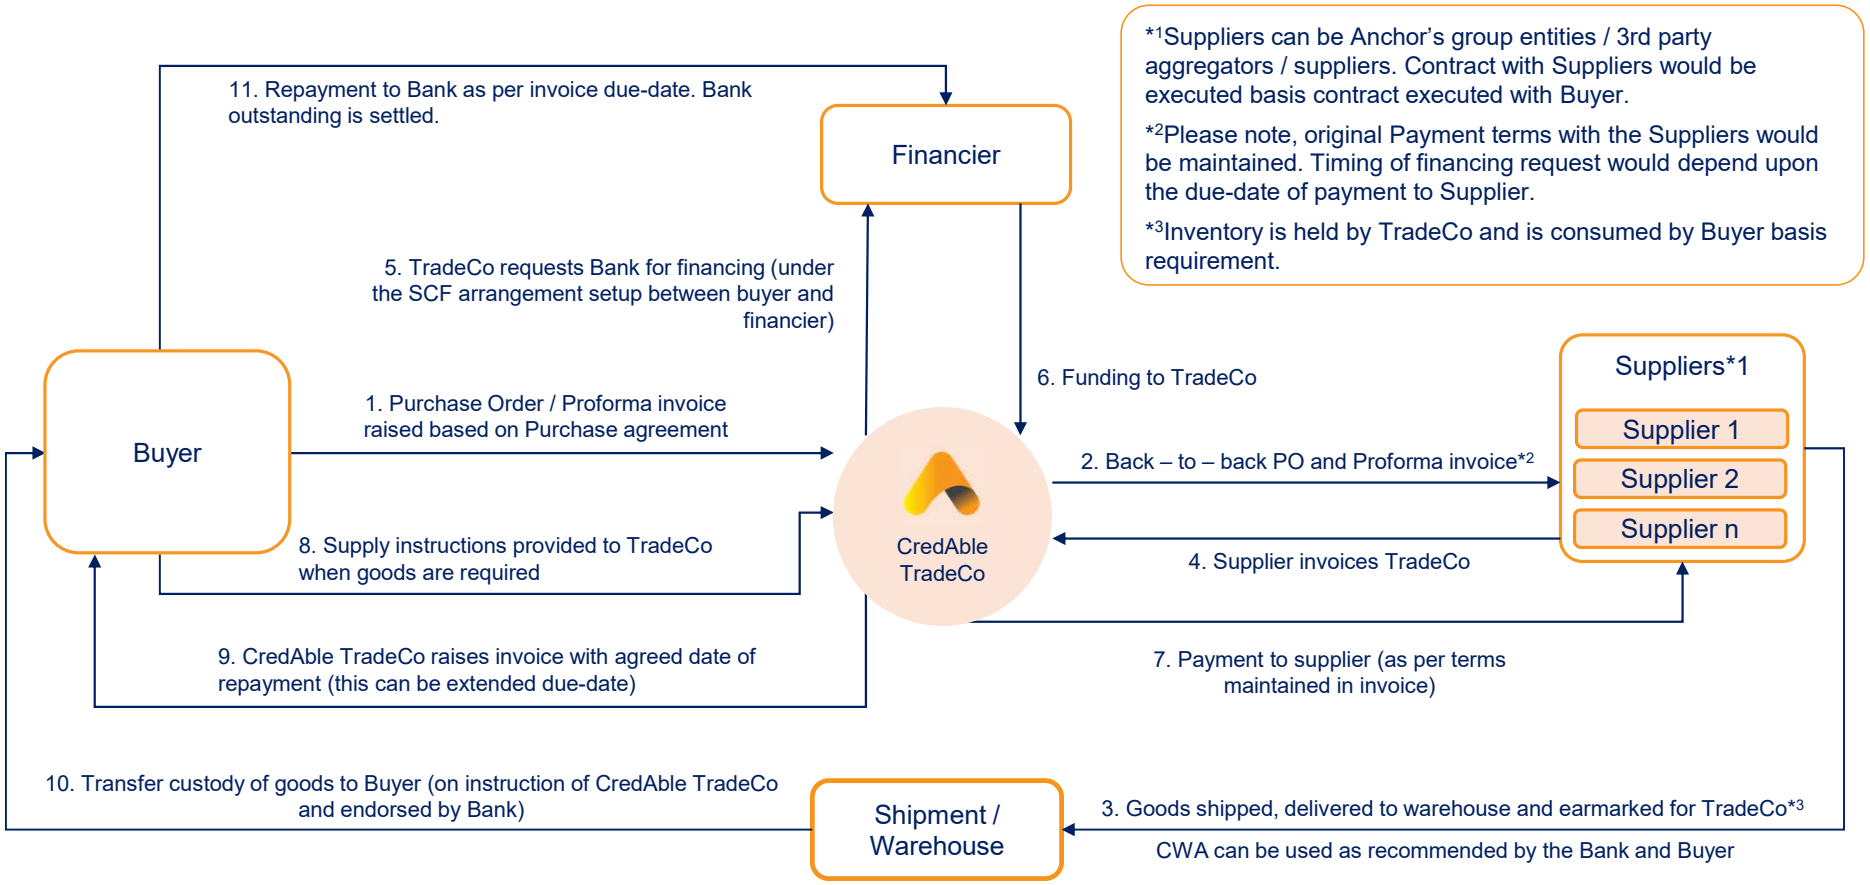

Flash Title Trade

A Flash Title Trade structure can be deployed to release liquidity and consequently improve payable days by extending credit periods for raw material, ancillary and services procurement.

Just in Time Inventory

A Just-in-Time inventory structure helps reduce on books inventory, thereby releasing liquidity and improving inventory position while staying true to strategic procurement plans and without any impact on the physical movement of goods.
